

AMMAR TANVEER

Software Engineering Student | AI/ML Enthusiast

ammartanveer020@gmail.com | +92 323 9897910

<https://www.linkedin.com/in/ammartanveer-se/> | <https://github.com/Ammar-1050881>

PROFESSIONAL SUMMARY

Software Engineering student with a strong interest in Artificial Intelligence, Machine Learning, Data Science, and Software Development. Experienced in building AI-powered applications, conducting data analysis, and developing web-based solutions through academic and internship projects. Possesses strong communication, presentation, and teamwork skills with a passion for learning, innovation, and solving real-world problems.

➤ **EDUCATION:** BS Software Engineering - CGPA: 3.58 | University of Lahore | Jan 2024 - Jan 2028

TECHNICAL SKILLS:

Languages: Python, C++, JavaScript (Basic)

Web Technologies: HTML5, CSS3, JavaScript, Bootstrap, Responsive Web Design

Libraries & Frameworks: NumPy, Pandas, Scikit-learn, Matplotlib, Transformers, BERT

Core Competencies: AI, Machine Learning, Deep Learning, GenAI, LLMs, NLP, Data Analysis, Software Development, OOP, SDLC, Database Design, Front-End Development

Tools: Git, GitHub, VS Code

SOFT SKILLS: Communication Skills, Presentation Skills, Teamwork & Collaboration, Problem Solving, Time Management, Leadership

➤ **EXPERIENCE:** AI/ML Engineering Intern (Remote) | Developer's Hub Corporation | Apr 2026 – Jun 2026

- Completed a 6-week AI/ML Engineering internship and delivered multiple hands-on projects involving Machine Learning, NLP, and Generative AI.

PROJECTS

News Classifier using BERT | NLP & Deep Learning

- Developed a news classification system using BERT (Bidirectional Encoder Representations from Transformers) to categorize news articles based on textual content.

GitHub: <https://github.com/Ammar-1050881/News-Classifier-BERT.git>

Heart Disease Prediction Model | Machine Learning

- Developed a predictive machine learning model using Python and Scikit-learn on a healthcare dataset to classify heart disease risk factors.

GitHub: https://github.com/Ammar-1050881/Task3_Heart_Disease_Prediction.git

Context-Aware RAG Chatbot | Generative AI & NLP

- Built a conversational chatbot using Lang Chain and Retrieval-Augmented Generation (RAG) with context memory and vector-based document retrieval. Deployed the application using Streamlit.

GitHub: <https://github.com/Ammar-1050881/Task4-RAG-Chatbot.git>

General Health Query Chatbot | Generative AI & NLP

- Engineered an AI-based conversational agent utilizing prompt engineering techniques to accurately process and answer general health-related queries.

GitHub: <https://github.com/Ammar-1050881/Health-Chatbot-AI.git>

Yali.com – Online Property Services Management System | Software Design & Architecture

- Implemented features for property listings, user interactions, and efficient data management while ensuring a responsive user experience across devices.

GitHub: <https://github.com/Ammar-1050881/Yali.com.git>

CERTIFICATIONS & EXTRACURRICULARS

- AI/ML Engineering Internship Certificate – DevelopersHub Corporation
- Introduction to LLMs & Generative AI – SoloLearn
- Distinction in Kangaroo International Test
- Active presenter and participant in university debates, hosting, and stage performances

LANGUAGES: English (Professional Proficiency) | Urdu (Native Proficiency)
